LETTERS TO THE EDITORS

Permission

Sirs:

Mr. Luce has referred to me your letter of September 28th asking permission to copy LIFE's cover and plan of contents for your yearbook.

Although we normally discourage any imitation of LIFE's format, we have, in several instances given permission to do so, and, therefore, feel that in this case we can give you the permission you desire

JOHN C. MANTHORP

Nazi Investigation

Sirs:

On page 63 of the 1938 NORTHERN I found a picture that fairly made me shiver. It was a picture of a group of students giving the Nazis salute to a person apparently "Der Furher." With such proceedings on this campus it is a wonder some patriotic organization hasn't sent a committee to investigate. I personally would do away with such flagrant attempts to establish Fascism on our campus.

A. READER

Ada, Ohio

● Have no fear; this was merely a "stunt" picture of the Press Club.—ED.

Bell Tower

Sirs:

I understand that the 1939 NORTHERN has a picture series of Hill Building's Bell Tower.

It seems to me with the great number of times a day the students of the University have to rely on this bell and also the number of times the clapper has mysteriously disappeared, that no one has taken the opportunity previously to do this.

To my knowledge, the clapper has been moved from the tower to various places. On one occasion it traveled as far west as California, being sent to former President Smith, who at that time was traveling there.

DANIEL CASSELMAN

Delta Sig House
Ada, Ohio

● NORTHERN's photographers spent one afternoon, skipping classes, to cover the Hill Tower assignment. Bill Oberlin, Superintendent of Buildings acted as guide. For pictures, see page 7.—ED.

SPEAKING OF PICTURES

.... HERE'S LIFE'S GREATEST MYSTERY AT NORTHERN

Scene of dark mystery is the bell tower of Hill Building. Here is the playground for those Houdini's of the campus who delight in passing through locked doors and silently stealing away with the bell clapper. A great deal of ingenuity must be exercised, since after one gets on the inside of the building it is necessary to go through a locked panel door, up a ladder to a trap door which is securely fastened by a chain and lock. This trap door allows one entry to the roof. Next is the heavy plank door that is held in place by a metal bar and lock. After passing this obstacle, the prize is in sight. To remove it one must be extremely careful as a slip of the wrench might hit the bell, causing students to arise for their first period classes with resultant detection of the culprits. With the removing of the clapper from its usual position, the pranksters slip silently from the roof to a place where it is to be secreted. The place of hiding has varied over the years. At one time it traveled to California in order that it might vacation with Prexy Smith. Another time it was found resting among the chapel organ pipes.

The feelings of the students, when the bell is unable to be rung, can only be expressed by the action that followed the disappearance of the clapper this Spring—the tolling hammers.

In the trip to the bell tower it is necessary for one to climb a twenty foot ladder. Then through a trap door which brings one out on the roof.

Entry to the tower is by a heavy plank door held in place with a padlock. Two other locks prevent at least some persons from entering the tower.

This bell sounds the beginning and ending of classes. One of the favorite campus pranks is to remove the clapper.

The mechanism that drives the hands on the three clock faces must be wound once a week.

View inside out of one of the glass faces. The drive shaft from the mechanism to the hands can be seen (center).

THE DEDICATION

BENJAMIN F. FAIRLESS

Photography by Bachrach

*President, United States Steel Corporation of Delaware
President, United States Steel Corporation of New Jersey*

To Benjamin F. Fairless, a trustee of the University and a loyal supporter of our institution. His name commands admiration and respect in the steel industry. After completing school at Justin, Ohio, he taught school for two years, saving money therefrom to enroll at Wooster College. He later transferred to Ohio Northern University, where he was graduated with a civil engineering degree. His business career began in June 1913 as a civil engineer for the Wheeling and Lake Erie Railroad. In August of the same year he became a civil engineer for the Central Steel Company of Massillon. In rapid order, he advanced in the company, becoming in turn mill superintendent, general superintendent, and vice president in charge of operations. When the United Alloy Steel Corporation and Central merged in September, 1926, Fairless was made vice president and general manager of the United Alloy Steel, a position he occupied until April, 1928. At that time he became president and general manager of the company. Two years later, in April 1930, when his company was one of the several united in the formation of the Republic Steel Corporation, he went into the new organization as Executive Vice President. When the newly created Carnegie-Illinois Steel Corporation was formed in 1935 from the Carnegie

Steel and Illinois Steel Companies, Fairless was offered, and accepted, the position of president, completing the transition in just 22 years, from a raw young surveyor in the field, just out of college, to the chief executive position in the largest single steel producing concern in the world. On January 1, 1938, he became president of the United States Steel Corporation. In recognition of Benjamin F. Fairless, son of a coal miner, a Northern graduate, a poised, mentally alert, maker of steel, the NORTHERN does itself honor in dedicating this volume to him.

IN DOUBT

Sirs:

In the view section of the 1938 was a photograph of Hill Building with the caption, "Hill at Midnight." This looks like a fishy picture to me, in other words a fraud. I was always under the impression that in order to take a picture it was necessary to have some light, and there surely wouldn't be any at night with the sun out China's way.

HUGO N. FRY

Lima, Ohio

● The picture to which you refer was taken with an ordinary camera, exposure of 20 minutes, aperture of F/8 using super sensitive panchromatic film. Most persons are unfamiliar with the fact that pictures may be taken wherever there is the least amount of light, providing the exposure is made over a long enough period of time. If Reader Fry will look closely at the building in question some night, he will see that some light is cast on the building by the row of lights along the front of the campus. Moreover, if Reader Fry is still unconvinced, he should notice the pictures of the fraternity and sorority houses on their respective pages—night photography. —ED.

Sirs:

In reference to your article on the staff working in the Sugar Bowl, as an eye witness, I think your lack of geographical knowledge of Ada is deplorable.

If you will recall there is a place near the Sugar Bowl well known by all and sundry for its fountain of ideas, and I would like the readers to know it is there that occurred the revised episode so glibly related. I have definite photographic proof to show that these events occurred Midway between the railroad tracks and the popcorn stand.

IONA PARE

Shanghai, China

Sirs:

I imagine by this time you have received the proofs of the engravings in question. Everything was shipped out night before last, which to our knowledge completed all the work for you this year.

Hoping that the final windup will soon take place and that you will be able to relax in a big way after a hard year.

F. N. ROPKEY,

Indianapolis Engraving
Company, Inc.

Indianapolis, Indiana

ROBERT WILLIAMS

President

Robert Williams has been president of Ohio Northern University since 1929. For one to mention only the demonstrated remarkable ability of Dr. Williams as an educator would be to present but one phase of his varied personality. On and off the campus we find our president always intensely human, possessing a great breadth of interest. He is a sports enthusiast, and is thoroughly at home in the fields of philosophy, religion, and foreign affairs.

WITHIN O. N. U.

THE DEANS

JOHN ALFRED NEEDY
M.S., M.E.

Dean of the College of Engineering

The University is fortunate in having such high calibre men as these four deans.

The deans' personality, keen judgment and insight, and understanding of the problems which confront the average college student stand them in an excellent position as administrator and adviser.

These men are doing all in their power, among the students and faculty to improve the attitude toward scholarship and promote a spirit of mutual understanding and good will.

The world needs, always, better engineers, chemists, lawyers, physicians, artists, accountants, business men, and builders of all kinds. A good school will teach more than merely skills. The world needs men with a wider understanding of the science of government, of philosophy, of art, of what people have done, of what they are doing, and of what they want to do in order to live together in a more kindly manner.

Assistant Professor of
Electrical Engineering

Professor Webb explains the graphic solution of the stresses in a Pratt truss. Structural Engineering 412.

AN ENGINEERING CAREER

Ability to plan, to select from a mass of material the important facts and assemble them in orderly thinking is more important than mechanical skill. The engineer is often a man of many manual skills. He is a man capable of directing the skill of others. He has imagination and accuracy, both in planning and in performance, for building bridges, or running a business, or for organizing his own life into patterns of usefulness.

There is more to being an engineer even than mastering mechanical skills and acquiring the ability to plan and to direct. Honor, intelligence, sound judgment, ability to get along with people, all these are as important to the engineer as they are to the lawyer, the physician, or the business man.

COLLEGE OF ENGINEERING

The Engineering College offers a program of study designed to produce an engineer of all around capabilities as well as a specialist in any one of the fields in which work is offered : civil, electrical, mechanical.

Northern's engineering graduates may be found in all parts of the world in positions of importance and distinction. These men, heads of large corporations, designers, or research men, have done much to advance the prosperity of mankind.

ALEXANDER WEBB

COLLEGE

The College of Law, now in its fifty-fourth year, is a member of the League of Ohio Law Schools and is approved by the American Bar Association. Among its alumni and former students are many of the prominent lawyers in Ohio and other states. Its graduates have been successful beyond the average as candidates for admission to the Bar at the State Bar Examinations, and as practitioners afterwards.

While considerable emphasis is placed on the Ohio Law, the work is conducted with a view to giving a systematic and complete grounding in

CLAUDE W. PETTIT
Professor of Law

E. VERGON SMITH
Professor of Law

The student becomes familiar with pleading incident to court work and gains an actual experience in try-

OF LAW

the history and fundamental principles of law, and a readiness and accuracy in the application of these principles to the complicated relations, rights, and duties arising in modern society.

The mental training afforded by the study of law is also becoming appreciated and sought by students who desire some intelligent occupation which will connect theoretical work with the facts of life, and enable them to apply their minds readily and correctly to such facts in any profession or business.

ing cases and arguing to the jury as well as to the court.

ARTHUR PHELPS

Assistant Professor of Law

WILLIAM OWEN

Instructor in Law

RUDOLPH RAABE

Professor of Pharmacy

The College of Pharmacy had its beginning in the departments of Science and Medicine. Following a passage of a law in Ohio, in 1884, which required registration with the Ohio Board of Pharmacy of all who wished to engage in the practice of the profession, Pharmacy was changed to a separate division of the University.

MILTON NEUROTH

Instructor in Pharmacy

GEORGE HOCKING

Instructor in Pharmacognosy

The College aims to prepare students for the legal requirements of the profession and also to give a knowledge of the business and technical methods involved in the successful distribution of medicinal materials.

The Student Health Service Dispensary is administered by the registered pharmacists on the staff of the College of Pharmacy.

COLLEGE OF LIBERAL ARTS

The George Franklin and Sarah Catherine Getty College of Liberal Arts is organized into four divisions: Language, Literature, and Arts; Natural Sciences; Social Sciences; and Teacher Training. Mr. Herrick, Mr. Harrod, Mr. Binkley, and Mr. Loy are chairmen of the respective divisions.

It is the purpose of the College of Liberal Arts to search into the reason and nature of political, social, economic, and spiritual philosophies and practices. Significant is it that men have always clamored for those intellectual enrichments which come from the poet and scientist.

ARTIST-LECTURE COURSE

Each year Ohio Northern University offers an artist-lecture course which students and many townspeople enjoy. Dr. T. J. Smull, business manager of the university, is chairman of the committee in charge of this instructive and entertaining course.

One number was presented each quarter during the past year. In October, the Phoenix Players appeared on Northern's stage in the production *Susan Hopley*. This melodramatic farce was produced in the nineteenth century style of acting.

Count Anton Carlson, Stockholm, Sweden, spoke before the student body in November, as the Winter feature of the forum course. At the conclusion of a delightful address on "My Impressions of Your United States," the "Count" aston-

ished the audience by announcing that, in reality, he was Alex Christiansjon. He concluded his program with several piano selections.

The most outstanding guest artist to appear at Ohio Northern this year was Louis Untermeyer, world famous poet, critic, essayist and editor. At the conclusion of his very enjoyable and highly entertaining lecture, Mr. Untermeyer read several of his own poems. This was his second appearance at O.N.U., as he was here in 1935. (Ed. Note—See page 57.)

While at Ohio Northern, Mr. Untermeyer conducted an informal question box forum for English students. Mrs. Untermeyer, who accompanied her husband, was graduated from the Ohio Northern College of Law in 1915.

HEALTH SERVICE

With the services of a full time resident physician and a registered nurse, Ohio Northern University maintains a very efficient health service for the student body. The University has its own infirmary and dispensary. Each student receives a yearly medical examination, office consultation and treatment by the physician, medicines from the dispensary, and the use of the infirmary in case of illness. An accurate record of the physical condition of each student is kept. The student is entitled to all this service for the payment of a very small fee.

A signal system, whereby patients in the infirmary may call the nurse, was installed this year. Such improvements are being constantly made in order to give students the very best service available.

Dr. Harry Wain has served for two years as the University physician. He was graduated from Loyola Medical School. This year he was granted several months leave of absence in order that he might take advantage of graduate work and a fellowship at the University of Michigan in the department of public health.

In the absence of Dr. Wain, Dr. Vernon A. Noble, of Lima, capably took over the health care of the students. Dr. Noble is a graduate of Ohio State University and the Ohio State University Medical School.

Miss Clara Erwin, a graduate of Lima Memorial Hospital, has completed her first year as University nurse.

Students are employed for office work at the infirmary.

ACTIVITY LIFE AT OHIO NORTHERN

CIO Director John Owens (right), also president of the United Mine Workers of Ohio, justifying the CIO at a Y meeting.

Ohio Northern's Band swings into an "N" formation during the half at the Wittenberg game. Furnished excellent music during the pigskin encounters.

A Superstition Party was sponsored by the WAA, Friday, January 13, for all the girls of the University, in defiance of the evil omens that are

usually connected with this day. During the party the girls played games and created a din.

Christmas tea for University girls. Dean Wilder, hostess, served tea and cookies. Conversated on feminine problems.

Activity life at Northern is greatly varied. It affords extra-curricular work for those students that want to make good use of their leisure time or develop their abilities. For those who are musically inclined, there is the hand, the orchestra, and finally the A Cappella Choir which has gained an outstanding reputation for itself. Two student publications, edited and managed by students, furnish excellent experience in news writing, photography, and greatest of all, dealing with other individuals. Technical organizations, player's groups, and debating complete this important phase of college life.

THE 1939 NORTHERN

In presenting this galaxy of glorious and beautiful half-tones the 1939 NORTHERN presents informal photos by Benson and Shannon. Orchids to Mr. and Mrs. Bill Frederick on their formal photos as well as the philosophy on politics and the European incidents. Dandelions to Roose for those pics of guys and gals when they weren't looking.

The editor proved full of energy and could be seen at most any hour with camera and lights moving from building to building trying to appear very busy. Business manager Feth tried his hand at photography, but proved that he would have been better with a guillotine.

Around the NORTHERN office could be heard such remarks as :could have stopped him with 300th of a second; develop to .7 gamma; copy; copy; Fletcher Henderson is better than Benny Goodman; don't put that gum on the chair; what game where? Sing boop boop ditum datum whatum chu, and you have the song that won the unanimous vote of the eighteen staff members. Hundreds, yea even more, students wandered into the office to ask the date

that the annual would be out. Except for the choir rehearsals the N.O. was otherwise quiet.

The ed. picked the taking of the pictures for the boiler test series as the most fun in the work on the book. He at least got more dirt and grime than the boys running the test. The best part of the book for most of the staff was writing copy—for their own amazement. Our adviser took pride and joy in finding the allusive phrase.

Some of the staff worked from last fall to the deadline, some started in the middle of the year, and some of the trusty staff, may their souls rest in peace, didn't do much work any of the time. To those who were faithful to the last, the management's sincere thanks.

None of the staff will forget the experiences gained in the book's production. Every one enjoyed to overflowing every moment spent on the NORTHERN, and we, the staff of the 1939 NORTHERN, can only wish that the preparation of the future NORTHERNS may be as fruitful.

THE NORTHERN REVIEW

To the layman the *Review* is a sheet of cellulose upon which printer's ink is applied bi-weekly, with or without mistakes, supplying the student with a smattering of the school news, a means of preparation for a romantic life, chasing fire sirens, interviewing beauty contest winners, etc., and finally becoming a big-time editor at \$100,000 or so per annum.

The *Review* office is usually a rather dull place. There are no reporters phoning in their news and the editor does not pace the floor, mumble to himself and tear his hair. Occasionally the monotony is broken by a bearer of gossip, who hopes to keep his name out of the column by his services.

So goes the newspaper. The reporters get the news. The editor editorializes and reads his fan mail, which usually begins Dear Sir: "I disagree with . . ." The faculty adviser applies the mop to the dirt column. The printers mistakes are not

corrected and occasionally an original line is added such as xk vkhs bdgkz., gh5y3. The make-up editor cuts too many stories. And the student uses the paper to get through a boring noon hour.

Some genius exists on the staff as witness the fact that the paper won the award for having the outstanding sports' story of the year. The story suggested the formation of two or three new leagues in place of the Ohio Conference. The story received favorable comment and attention from outstanding sports authorities. The paper also won first class honors in national competition.

Not all of the work on the paper is done by the editorial staff. Paul Creps and his cohorts slaved mightily that the paper might have sufficient ads. His path took him far and near, as well as to the nooks and crannies of Lima and Ada. Chamber of Commerce please note plug.

PRESS CLUB

Back Row, Left to Right: Klotman, Chesler, Shook, Young, Crawford, Rianco, Woodworth, Aiken, McCoy, Messersmith, Chrispin, Roose, Casselman, Carhart, Richardson, Rirnbaum. *Middle Row:* Gittleson, Doehla, Booher, Wertheimer, Papenhausen. *Front Row:* Spon, White, Moore, Freeman, Kerke, Hover, Shannon, Ramge, Feth.

PRESS CLUB

The Press Club is composed of students interested in journalism and in the student publications, the *NORTHERN*, the *Northern Review*, and the *Freshman Handbook*. At the meetings, the student has ample opportunity to study editorial policies and news methods. Through guest speakers problems and experiences outside the students present scope are brought to his attention.

Here he is given an opportunity to realize the responsibility of the news reporter to the readers of his paper; that his duty is to report what he can learn on any assignment in what he believes to be its true form; that he should not intentionally print facts that have no truth; that his policies must not be regulated to help his friends at the expense of another either politically or otherwise.

The Press Club also offers the staffs of the student publications an opportunity to become acquainted with the other pub-

lications and their work. By comparing problems the student extends both his knowledge and experience.

The organization is not unknown socially. In the past the group has gathered for informal parties, as well as holding dances occasionally. The requirement to be filled by those who wished to attend these functions was that they submit either editorials or suggested assignments.

While of high value to the student of journalism, the society proves valuable as well to the student who has adopted journalism as a hobby or extra-curricular activity. Here he has a proving ground for his ideas, and he may witness the developed work of others. By accepting the criticism of others he may improve his own work.

The faculty adviser for the Press Club is Lawrence Freeman, who is the adviser to the student publications as well.

PICTURE OF THE YEAR

April 6th, in Lehr auditorium, Louis Untermeyer presented a lecture on "The Modern Arts." In his address Mr. Untermeyer attempted to show that American art has come of age and is no longer dominated by European influences. The lecture was spiced with humor and wit.

World famous as a poet, critic, essayist and editor, he came to Ohio Northern as part of the artist lecture series. As a prelude to his evening address Mr. Untermeyer held an informal forum for English students of the University.

Louis Untermeyer was born in New York City in 1885. He has lived there, except for brief intervals, ever since. His education was fitful and erratic; he sometimes boasts that he is the least educated writer in America. He attended the De-witt Clinton High School, but his failure

to comprehend the essentials of algebra and geometry prevented him from graduating. He went to college years later as a lecturer, not as a student. As to his education he sometimes says that he was mis-educated and has spent some time since, teaching teachers what not to teach. In his youth his ambition was to become a composer, and at the age of sixteen he appeared as a semi-professional pianist. At seventeen he entered his father's jewelry manufacturing establishment. Advancing to the vice-presidency, he retired in 1923. After two years of study abroad, he returned to America to devote himself entirely to literature.

He was accompanied on his lecture trip here by his wife, the former Esther Antin, who was graduated from the College of Law in 1915.

NORTHERN GOES TO A PLAY

This box was well filled by the time the court convened. Theories on how to effectively stuff the box were heard just before curtain time.

The jury, twelve men and women, chosen from the names deposited in the box. They proved to be sentimentalists, for their verdict was, not guilty.

The Major at his best. Answering this last, minute question, straightening that wig, and many other things that demand his vast store of experience.

The defendant, Karen Andre, coolly answering a question of her attorney, as if it were some one else's life at stake, than hers.

Action at last, the defense and prosecuting attorneys having it out before the court.

Northern Players closed their season with "Night of January Sixteenth." After starting the year with two plays of rather ancient vintage, "Men Must Fight" and "Peg o' My Heart," the modern drama was brought to Northern's campus in this Broadway success.

"Night of January Sixteenth" is a comedy wherein the entire setting is in a New York City court. The defendant, Karen Andre, portrayed by Kay Goeke is the vivacious mistress of the murdered man. The ruthless and able prosecuting attorney was played by Huber Staley, while the defense attorney was portrayed by Robert Klotman.

The jury, picked from the audience, refused the plea of the state's attorney for the death of Karen Andre.

Northern Players thrive under the able and experienced leadership of Major Deming. It is the aim of the club to further and foster the amateur theater on the campus. The group has been under the direction of Betty Lee Arbogast, president; Curtis Crawmer, vice-president; Leroy Keel, secretary; and Dwight Carhart, treasurer.

Back Row, Left to Right: Rianco, Crawmer, Goeke, Ramge, Disbrow, Metzger, Underwood, McPeck, Arnold, Deming. *Front Row:* Spon, Ransbottom, Staley, Klotman, Brewer, Arbogast, Carhart, Hunt, Wenner, Moore.

Character actors, Sered Youngquist and Doc Kirkland.

An' so I sez to him I sez.
The defense attorney and Guts Reagan.

Hold it my lovely lady,
he only wants to hang you. The two attorneys and the defense.

It ain't so, no one could do this to a cop. Officer Sweney and defense attorney.

Well, Doe, did he die or didn't he? Defense attorney questioning Doc Kirkland.

Rozarth, Royon, Lust, Slesman, Booher, R. Hover, Oller, Cottrell, Miller. *First Row:* C. Warner, Yancy, Hunt, Clark, Lutz, Horst, Holcomb, Bailey, Owens.

A C A P P E L

The A Cappella Choir is without a doubt the best known activity of the University. The choir was organized in 1936, under the direction of Haydn Owens, and has made rapid strides musically and in its public appeal, appearing with great success before civic organizations, schools, and churches.

The annual trip this year was a return engagement to Chicago, for the second concert in Kimble Hall in the last three years. They created a very favorable impression among music lovers and critics.

Haydn Owens, nationally known as an authority in the field of vocal music and choral conducting, came to Ohio Northern from Chicago where he has been active as an operatic and oratorio coach, as a teacher of voice, and a director of church music.

The vested choir sings from memory, wide repertoire of the unaccompanied sacred choral music of all ages; the classics of the sixteenth century, Russian compositions, and especially the works of the modern and contemporary American and English composers.

Sixty men and women students combine their voices with a remarkable degree of skill and musical understanding to create this vocal symphony. Majestic crescendos and beautiful pianissimos provide the listener, musically educated or otherwise, with a thrill and an inspiration.

Officers are: John Walters, president; Robert Lintz, vice-president; Roberta Holcomb, secretary; Huber Staley and Dwight Carhart, business managers.

Back Row, Left to Right: Ernsberger, 3. Bozarth, Walters, Carhart, Staley, Rutledge, Winegardner.
Third Row: Sowards, Jarvis, Huber, Connor, Hafer, Person, Klingler, Ansley. *Second Row:* Gilbert, R. Eley, Coppersmith, Place, Kerr, Schneider, Huston, George. *First Row:* Weirman, Shank, Fisher, Casper, Disbrow, Newhouse, Runyon, Eyster.

ORCHESTRA

Knowing more strains than a genealogy expert or bridge engineer, the University Orchestra is tops for classical music on the local campus. In direct contrast to the band, the orchestra confines its efforts strictly to classical numbers.

Operetta, Spring Festival, broadcasts from Lima's WLOK, and other concerts are always made more complete with the music presented under the able leadership of Donn Watson.

Playing classical numbers is not an easy task. In some bars, the wood-winds have to hold their notes longer than the United States has held those of the European countries. Sometimes quick change must

be made from pianissimo to fortissimo, and for those who are not acquainted with music, this is not an Italian roadmap, but a rapid change from soft to loud.

It is well that the orchestra upholds the classic. With the band becoming the champion of the modern pieces and the orchestra giving its best for the classic, it balances the diet of diacoustics.

Within the personnel of the orchestra is the best talent on the campus. Without a doubt most of the credit of this outstanding organization goes to Mr. Watson for his splendid work in training the group until it stands among the best of Ohio college instrumental groups.

BAND

Substituting for the laughing ladies who in the olden days tossed among other things, gloves and gem and fruit to encourage the handsome gladiators, the Ohio Northern Band has been furnishing martial music as inspiration for Polar Bear Warriors. Indeed it is commendable how faithfully these musicians have performed.

During the spring and winter seasons the band was under the direction of William McBride, who left Northern for a similar position at Ohio State. His place was taken by Harold G. Davidson, under whose direction the band presented two concerts the Spring quarter.

The band is one of the oldest organizations on the campus and draws from all colleges.

Paradoxically, the band is continually getting the pitch, yet they always hold their jobs. In former years these campus Sousas have been excellent, but excellent is an old-fashioned way. Like the other best bands in the country, the University Players gave renditions of the familiar classical marches and choruses which have endured through the ages.

But no longer do they confine their repertoire solely to orthodox band pieces. *Alexander's Rag Time Band*, *Rei Mir Bist Du Schon*, and others from Gershwin and Goodman have taken their place in the band's musical library along with Goldman and Sousa.

MEN'S DEBATE

Woodworth, Metzger

Risnco, Roberson, White

WOMEN'S DEBATE

Four of last year's debaters, Betty Lee Arbogast, Doris Clark, Joan Stanfield and Pauline Cole, returned for another year's service on the women's debate squad. Fae Burr, veteran debater from Capital University, and Catherine Goeke, a newcomer, completed the teams. Major Cliffe Deming coached the group.

The question for debate this year was "*Resolved: That the United States should follow a policy of isolation toward all nations involved in international or civil conflict.*"

Preliminary practice debates were held on Northern's campus with Ohio University and Wittenberg. These were non-decision meets. Northern was unfortunate in that a number of scheduled de-

bates had to be cancelled because of inclement weather.

Ohio Conference teams which Ohio Northern debated were Capital University, Denison University, Earlham College, Ohio University and Wittenberg College. Ohio University won the Conference championship. For the first time in its history, the women's debate squad was not victorious in one meet.

This year's affirmative team was composed of Fae Burr, Betty Lee Arbogast and Catherine Goeke. Pauline Cole, Joan Stanfield and Doris Clark made up the negative team. A new ruling changed the number of debaters on the team from three to two.

MEN'S DEBATE

Under the able direction of Major Cliffe A. Deming, the men's debate teams turned in splendid work this year, tying for second place in the Ohio Conference. Of the sixteen Conference debates, only six were decision meets. Northern collected five wins.

This year's teams were composed of veteran debaters. Walter White, Dominic Bianco, and Donald Roberson were the members of the affirmative team. The negative team was composed of Philip Spain, Lawrence Woodworth, and Henry Metzger. An innovation made in the rules this year cut each team to only two members instead of the previous number, three.

The question debated this year was "*Resolved, That the United States should*

cease using public funds for the stimulation of business."

At the beginning of the season, Northern debaters made a tour on which they met five colleges in non-decision meets. Findlay, Mt. Union, Hiram, Western Reserve, and Oberlin were the colleges visited.

The Ohio Conference teams which the O.N.U. squad met were Ashland College, Baldwin Wallace College, Bowling Green State University, Muskingum College, Capital University, Earlham College, Kent State University, University of Toledo, Otterbein College, Wittenberg College, Bluffton College, Denison University, University of Cincinnati, Heidelberg College, Kenyon College, and Ohio University.

ardson, Youngman, Lovett.

OHIO NORTHERN UNIVERSITY PHARMACEUTICAL ASSOCIATION

The Ohio Northern Pharmaceutical Association was organized in 1905 for the purpose of fostering the professional aspects of pharmacy. The constitution then drawn up has been so satisfactory that it has remained essentially unchanged through the years.

Open House, sponsored by this organization, was held May 9 and 11 in order to acquaint the public with the fine background the pharmacist has and also to demonstrate that the College of Pharmacy plays an important part in the world of life outside the preparation of prescriptions. Open House was climaxed by a dance given for the high school students in connection with High School Day on May 9.

On May 4 and 5 the association went through the plant of the Eli Lilly and Company, located at Indianapolis, Indiana, where they witnessed the preparation

of serum to be used in treatment and prevention of disease.

Meetings, held twice monthly, consisted of talks by local faculty members, papers by students on the latest developments in their field, and outstanding speakers. Among these were: Mr. Smullan, a representative of the American Druggist Magazine, who spoke on the problems of the profession; Mr. E. C. Peterson, a representative of the Eli Lilly Co.; and Mr. O. P. Merriam, of the Benton Dickson Co., on the manufacture, selection, and care of chemical thermometers, hypodermic needles and syringes.

Officers for this year were: Edward Johnson, president; William Southern, vice-president; Morton Strauss, secretary, treasurer. Milton Neuroth, an instructor in pharmacy is faculty adviser for the group.

OHIO NORTHERN ENGINEERS' SPEAKERS ASSOCIATION

ONESA, Ohio Northern Engineers' Speakers Association, was formed by a group of engineering students in the spring of 1935 for the following purpose: the development of forensic ability in extempore.

Membership is limited to fifteen engineers, and new members are drawn from the ranks of the upperclass students in the College of Engineering.

Two prepared speeches are given following a dinner, and in addition, the temporary toastmaster calls upon one of the members for an extemporaneous speech. Subjects for the speeches must be non-technical in nature and usually last ten or fifteen minutes, depending on the member's ability to expound. Following the three speeches the group criticizes not only the speakers but also the temporary

toastmaster. By so doing, disagreeable actions of the speaker and errors in presenting the speech are called to the attention of members. Talks vary in subject matter from Albania to zymology, spiced with a few stories.

It was at an ONESA meeting that the plan to place a speech course in the engineering curriculum, was originated. Following the formation of the plan it was presented by a committee to President Williams and the engineering faculty. These men were favorable to the plan and later were instrumental in its adaptation.

There is but one office in the organization, that of chief toastmaster. These were as follows: Paul Adam, Fall quarter; Edward Youngman, Winter quarter; and Earl Salo, Spring quarter.

THE CHEMIST'S CLUB

Back Row, Left to Right: Miley, Lust, Sloan, Messersmith, Bloom, Marshall, Brewer, Wenner, Halstead, Gard, A. Tomlinson, Taylor, Disegi. *Seated, Left to Right:* Pond, Campbell, Miller, Leathermen, R. Tomlinson, Ernsberger, Harrod.

THE BIOLOGY CLUB

Back Row, Left to Right: Toback, Hurley, Feinerer, Rinkley, Chrispin, Brewer, Pigozzi, Tipple, Kirschenbaum, Mills, George, Robinson, Fisher, Miley, Lehman, Burke, Wyler, Pounds, Serinsky, Saracco, Moore, Lloyd. *Seated, Left to Right:* Roznrth, Antozweski, Huber, Coppersmith, Rendin, Dobbins.

CHEMISTS' CLUB

The membership of this organization is made up of those students who expect to make the tedious task of tending a test tube their life work. The club meets bi-weekly in Dukes Memorial at which time technical papers are read and subjects of general interest to chemistry majors, pharmics, and chemical engineers are discussed.

The directing force of the Club is those members who belong to the Ohio Northern Student Affiliates of the American Chemical Society. This group is governed by a constitution set up by the parent society to which it must make a full report of its activities during the year. The purpose of the student affiliate organizations is to train the chemistry students of today for membership in the American Chemical Society.

One of the main activities of the club is the planning and presentation of a display for High School Day. The chemistry

department was well represented by the extensive program carried out this year.

At various times during the year prominent men in the field of chemical education are invited to address the group. The speakers who visited the campus and addressed the Club were Dr. Laurence L. Quill, of Ohio State University, and Dr. Ed. F. Degering, of Purdue University.

Inspection trips to a sewage treatment plant, oil refinery, and a water works were included in the year's activities. These trips are usually arranged through the efforts of the faculty advisers and alumni and give the student an insight into practical applications of chemistry.

The officers of the club for the year were Gerald Leatherman, president; Richard Tomlinson, vice-president; and Fred Ernsberger, secretary-treasurer. Dr. Jesse R. Harrod and Dr. Lewis E. Miller act as faculty advisers.

BIOLOGY CLUB

The Biology Club is composed of those students who are majoring in biological science and those who are especially interested in biology. It has held bi-weekly meetings throughout the school year. It has a membership of about fifty. The purpose of the club is first, to create and promote a keener interest in and a better understanding of the biological sciences and secondly, to promote the good fellowship of its members. Advisers are Dean Huber and Dr. Dobbins.

The Club got under full sway with a picnic given by old members for the new ones. Besides student participation in book reviews and biological projects, there were notable guest speakers, among whom were Dr. Harry Wain, Dr. D. O. Harry, Superintendent of State Tuberculosis Hospital, Lima, Ohio, on the subject of "Tuberculosis"; Dr. Dante Pigozzi, spe-

cialist of social diseases, Pittsburgh, Pennsylvania, on "Contagious Diseases and Their Symptoms." Dean Huber gave an interesting summary of his trip through the southern part of the United States, stressing the biological aspect. Dr. Dobbins, at another meeting gave the functions and purposes of the Ohio Academy of Science. At the mid-winter meeting, the Biology Club was the guest of the chemistry club at which time Dr. Boord, of Ohio State University, spoke on "The Evolution of Research Problems" and stressed various phases of his work with hydrocarbons.

Social events of the year included picnics, soup suppers and side trips.

Officers of the year were Larry Rending, president; William Pigozzi, vice-president; and Ruth Coppersmith, secretary.

THE AMERICAN INSTITUTE OF ELECTRICAL ENGINEERS

Rack Row, Left to Right: Stump, Philpott, Augsburger, Huber, Taggart, Filliez, Delamater, Doty, Padden, E. Rogers, Keller, Vincke, Moberley, Freund. *Second Row, Left to Right:* Papenhausen, Feth, Lindstrom, Grafe, Pearson, Orr, Huston, Noble, Lebold, Heistand. *Seated, Left to Right:* R. Rogers, Chester, O. Rogers, Sorman, Coleman, Gabriel, Halstead.

THE O.N.U. SOCIETY OF CHEMICAL ENGINEERS

Standing, Left to Right: Brogan, Billing, Nagy. *Seated, Left to Right:* Messersmith, Campbell, Miller, Sloan, Gard, Harrod.

THE AMERICAN INSTITUTE OF ELECTRICAL ENGINEERS

The American Institute of Electrical Engineers, a national organization, is represented at Ohio Northern by an active student chapter to which any electrical engineering student is eligible for membership. This is the oldest engineering organization on the campus. Meetings are held twice a month when papers are presented and talks given pertaining to the electrical engineering field.

The purpose of the organization is to aid in the development of the student engineer by acquainting him with theories and practices outside of his immediate training in classroom and by giving him valuable practice in addressing an audience.

The inspection trips to surrounding cities are one of the chief activities; on these trips the student gets a first hand insight into the manufacturing methods and procedures. One of the high spots of the year was a trip to Washington, D.C.,

to attend the district convention. The electricals are still talking about the "spots." This, along with trips to Detroit, Lima, and Cleveland, rounded out the activities away from the campus.

Speakers from General Electric, American Telephone and Telegraph, Standard Oil, and Graybar Electric, were brought to the campus by the A.I.E.E. When speakers were presented, the meetings were open to the entire engineering college. An interesting day was provided during Engineers' Week when a series of motion pictures showing the difficulties encountered by the Bell Telephone Company during the 1938 hurricane on the East coast was shown at the local theatre.

The organization is indebted for a successful year to its officers: Paul Chester, president; Clare Stump, vice-president; Eugene Rogers, secretary; Richard Papenhausen, treasurer; and D. S. Pearson, faculty adviser.

THE OHIO NORTHERN UNIVERSITY SOCIETY OF CHEMICAL ENGINEERS

The chemical engineering student at Ohio Northern were represented in the extra curricular work in the Engineering College by the O.N.U. Society of Chemical Engineers. Chemical engineering was temporarily dropped from the curriculum this year because of the fact that the facilities for the study of chemical engineering are at present limited in the College of Engineering. In spite of the disadvantages suffered by the Society by reason of this change, the group was able to carry on and to do its part in the various activities of the engineers.

The Society meets bi-weekly throughout the school year to read technical papers and to discuss subjects dealing with their particular field of engineering. As the chief topic for discussion, the group elected to make a study of the aims and accomplishments of the National Farm Chemurgic Council which has as its object: to advance the industrial use of American farm products through applied

science. The Society was able to secure material for this study from Mr. Wheeler McMillen, chairman of the Council and an Ohio Northern alumnus.

During the spring quarter the Society cooperated with the Chemists' Club in carrying out the chemistry department displays for High School Day.

The group took inspection trips to several industrial plants in Findlay and Dayton. These trips serve to acquaint the student with the many different activities of the chemical industry.

Dr. James R. Withrow, head of the chemical engineering department at Ohio State University, visited the campus and addressed the Society on recent advances and contributions of chemical engineering to other branches of engineering.

Officers elected for the year were Larry Campbell, president; William Billings, vice-president; Forest Gard, secretary-treasurer. Dr. Jesse R. Harrod is adviser to the group.

NU THETA KAPPA

Top Row, Left to Right: Brame, Roth, Billing, Papenhausen, Sharer, Nave, Wertheimer, Messersmith. Seated, Left to Right: Augsberger, Adam, Campbell, Nagy, Freund.

ENGINEERS' EXECUTIVE COMMITTEE

Left to Right: Adam, Chester, Roose, Campbell.

NU THETA KAPPA

Nu Theta Kappa, the goal of every engineering student at Ohio Northern, is a local honorary engineering fraternity. This organization has as its principle objective the promotion of higher scholarship among engineers. It wants students with ambition for service and achievement in science and engineering—young men with the imagination to create ideas and the determination to carry these ideas through.

The group meets at various times throughout the school year to discuss engineering subjects. They sponsor one social function during the Spring quarter.

Membership qualifications are comparatively strict since any engineer must have at least a 1.7 average before he is eligible to become a pledge of the fraternity. Each year the sophomore engineer who has the highest point average over 2.0 and all juniors and seniors who have

maintained a 1.7 average are elected pledges.

To become a member, each pledge is required to make and wear, during one week of the spring quarter, a large wooden replica of the key of the organization, as well as some piece of equipment signifying the branch of engineering in which he is interested. At this time they are also instructed in the principles of the fraternity. This year the officers and members are Paul Adam, president; Larry Campbell, vice-president; Herbert Augsberger, secretary; Charles Nagy, treasurer; and Paul Freund.

Pledges were Merlin Scharer, Joseph Nave, William Billings, Vinton Brame, Joseph Wertheimer, Robert Roth, Richard Papenhausen, and Robert Messersmith.

Faculty: Dean J. A. Needy and Alex R. Webb.

ENGINEERS' EXECUTIVE COMMITTEE

The Engineers' Executive Committee is made up of the presidents from the four engineering societies on the campus. This year the members and the officers were as follows: Paul Adam, president, mechanical engineering; James F. Roose, vice-president, civil engineering; Paul Chester, secretary, electrical engineering; and Larry Campbell, treasurer, chemical engineering.

The purpose of the Committee is to plan and direct the activities and uphold the traditions of college; to encourage the science of engineering, and to unite the different branches of engineering into a more cooperative and united group.

The chief function of the Committee is to plan and direct the activities of Engineers' Week which is held each year during the winter quarter in commemoration of George Washington's birthday. Each

day of the Week is planned and sponsored by one of the four engineering societies. The daily programs are designed to acquaint the student with engineering as it is actually practiced and consists of speeches by prominent engineers, representing various industrial organizations and state universities, as well as moving pictures loaned by such concerns as United States Steel, General Motors, and General Electric. These programs receive a fine response from the student body.

The climax of Engineers' Week is the Engineers' Ball held on the Saturday night following. This year the decorations were designed and planned by Edson Thompson and carried out through the cooperation of the decoration committee and other ambitious students. Joey Ray and his orchestra furnished the "swing" for the affair.

EXPLAINING THE INTRICACIES OF A TRANSIT, ENGINEERS' BALL

THE OHIO NORTHERN STUDENT CHAPTER OF THE OHIO SOCIETY OF PROFESSIONAL ENGINEERS

The engineering students organized the Ohio Northern chapter of the Ohio Northern section of the Professional Engineering Society in February, 1938. The Ohio Professional Engineers are a subdivision of the National Society of Professional Engineers. The Northern student chapter, the first student chapter to have been organized by this society, this was largely the work of Perry T. Ford, once a student at Ohio Northern. Holding the chief executive's post of the organization, he was naturally anxious that this group have a student chapter.

Organized during Engineers' Week, the society had a stormy baptism and emerged with the Engineers Executive Committee

as acting officers. The new officers were elected before the close of school. The Fall of 1938 found the organization running much more smoothly, and its first function, the all engineers' smoker, was held in the assembly room in the municipal building.

When organized, the society was to furnish the student with social activities and keep him in touch with the parent society. With the reorganization of the engineers' executive committee, part of the organizations' purpose was gone.

Officers for the past year were James F. Roose, president; Louis Vickio, vice-president; Earl Salo, secretary; Paul Chester, treasurer.

THE ENGINEERS' BALL

An engineer must be as much at ease in a "tux" as in a pair of overalls. So trading grease and grime for tired feet and depressed finances, Northern's Sons of Saint Patrick moved merrily to the rhythm of the musical vibrations given forth by Joey Ray and his Band.

Combining the talent, of the four departments of the Engineering College, pre-chemical, civil, electrical, and mechanical, resulted in an affair that topped off Engineers' Week.

Specifications of the Ball:

Place: Taft Gymnasium.

Time: Anytime after 8:30, March 25th.

Who attended: Young ladies escorted by engineers, of course.

Why? Who wouldn't rather be in the presence of fragrant perfume, than grime.

Decorations: Among the best, that have appeared. The main floor of Taft was completely enclosed, sides and top. Lighting was indirect from a huge tent piece suspended from the ceiling with smaller lights emitting their glow from the corners of the room. On either side of the band stand were a transit and a level.

THE AMERICAN SOCIETY OF MECHANICAL ENGINEERS

Back Row, Left to Right: Eyster, Verdine, Earnest, Wyatt, Shannon, Messenger, Scharer, Dunn, Rae, Hale, West, **Gertz, Shook, Blue**, Runner, Reatty, Moon, Browning, Bowden, Godfrey, Lemley, Downing, Ricker, Park, Troup, Sunday, Havir, C. Buess, Thacker. *Middle Row, Left to Right:* Salo, Miller, Rischoff, Casselman, Neiheiser, Frognowski, Lovett, Roth, Edsall, Reich, Wertheimer. *Seated, Left to Right:* Thomas, Wojnar, Youngman, Bauman, Hughes, Huston, Petach, Bosse, Schick, Fett, Opfer.

THE AMERICAN SOCIETY OF CIVIL ENGINEERS

Rack Row, Left to Right: Mann, Hanline, Eicher, Ringlein, J. Clark, Conner, Metcalf, Cremean, L. **Clark**. *Middle Row, Left to Right:* Myers, Opdyke, Lyman, Fudge, Rogers, Fiedler, Wilson, Rath, Arthur, Davies. *Seated, Left to Right:* Forney, Webb, Brame, Weaver, Roose, Kline, Ash.

THE AMERICAN SOCIETY OF MECHANICAL ENGINEERS

The Ohio Northern Student Branch was formed by the mother society with the purpose of fostering an interest among the students in the current problems of mechanical engineering and in the latest developments in the field.

This is brought about through bi-weekly meetings when the society members gather to hear lectures of prominent engineers or listen to student papers.

To stimulate forensic abilities, the embryonic engineer is encouraged to give papers before the society. Prizes are awarded to those, who, in the opinion of the judges, have come more nearly approaching the standards set up by the national society.

To gain a first hand knowledge of industrial plants and their operations, inspection trips were made to the Lima Locomotive Works, Springfield and Lima

Plants of the Ohio Steel Foundry, the Bluffton Plant of the Central Ohio Power Company, and various other industries.

Each year delegations from the leading engineering schools in the middle west gather for the Allegheny Regional Student Conference. This year, Case School of Applied Science, Cleveland, will be host May 1st and 2nd.

In the past, delegations have traveled to Washington, D.C., Columbus, Ohio, and Toronto, Canada. Some will still remember the George Washington of the Columbus Conference and the cigarro speed smoking contest of the Toronto affair.

Officers of the society are Paul Adam, president; Edward Youngman, vice-president; Jack Runner, secretary; Joseph Richardson, treasurer; and Dean John A. Needy, honorary chairman.

THE AMERICAN SOCIETY OF CIVIL ENGINEERS

The Ohio Northern student chapter of the American Society of Civil Engineers was founded in the year 1926. The aim of the society is to provide a forum for training the student in the preparation and presentation of papers. The society is also a means of augmenting the technical information gained in the classroom. In his search for material, the student becomes aware of the civil engineering world in its many phases.

The membership of the society is made up of the students in the civil department of the engineering college. This year, as in the past, the membership has consisted one hundred per cent of the available membership. This apparently justifies the activities of the organization.

Programs during the societies meetings are made up of the students participating as well as outside speakers and illustrated lectures. The social activities are outside the regular meetings and are in the form of smokers as well as participation in the engineers' ball.

A major part of the societies' program for developing the students' interest in the engineering world are the trips made to various industrial centers. Trips have been made to Cleveland, Columbus, Marion, Dayton, Lima, and other points. The subjects studied on these trips are water supply, drainage problems of municipalities, dam construction, sewage disposal, and building construction problems.

An incentive to the juniors and seniors is the prize given by the Cleveland section to the student outstanding in scholarship, interest in civil engineering, and social activities. The prize is a year's membership as a junior member in the parent society. The award is made each year at a meeting of Case, Akron, and Ohio Northern in Cleveland at the end of each school year.

The officers for the past year were James F. Roose, president; Everett Forney, vice-president; Robert Ash, secretary; Rexford Rath, treasurer; and Prof. Alex R. Webb, faculty adviser.

RADIO CLUB

Small but ground covering is the boast of the Radio Club, an organization which until this year was known as a rather dead one. The purchase of a new 75-watt transmitter and the addition of several benches in the club room got them off to a fresh start, and they are still going strong. The gift of an airplane transmitter and receiver was a tinkerable asset.

What was practically the organization of a new club began in the fall, and with the resumption of the old call letters, W8AOT, the station was established and communications were begun. A class for code beginners was started, and they have been meeting faithfully, practicing for their amateur license. The holding of amateur licenses by several of the club members and the fact that the transmitter must be operated by a licensed man furnish a further incentive for those as yet

unlicensed to work toward that goal.

Meetings were held every Tuesday evening at which time some member would give a lecture on a subject pertaining to amateur radio or related field. The club-room, located as it is above the stage in Lehr, is known only to a few, but you usually could find some hopeful "ham" up there "chewing the rag" or just listening. The future plans of the club promise another successful year with the possibility of adding of new equipment.

One trip to Columbus was taken to hear a speaker from the research laboratory of the Bell Telephone Company. As usual a good time was had in Columbus.

The officers for the past year were Paul Chester, president; Wade Philpott, vice-president; Herbert Augsburg, secretary-treasurer; and D. S. Pearson, faculty adviser.

KAPPA KAPPA PSI

The honorary band fraternity, Kappa Kappa Psi, was founded at Oklahoma A. & M., Stillwater, Oklahoma, in 1919. The Sigma Chapter at Ohio Northern University was chartered in 1927.

The Kappa Kappa Psi Honor Society was organized as a national band fraternity to encourage interest in bands by college bandsmen throughout the country. It is made up of musicians selected, not only for their ability musically, but also for character, cooperative ability, and interest in the further development of the University band. Membership is by invitation.

The purpose of the fraternity is to make the University band better through advancement and cooperation.

A new tradition was started this spring when the fraternity gave a dance in honor of all band members at Taft Gymnasium, April 21. It is expected that this will become a yearly event. Robert Lintz was chairman of the program.

At the present time there are forty-one chapters of the organization located throughout the country. One of the most prominent members was John Philip Sousa, the noted band conductor and composer.

Dean J. A. Potter and Dr. T. J. Smull are faculty members. Other members are Robert Lintz, president; Burton Bracy, secretary-treasurer; Robert Tipple, William Seeley, John Brewer, John Bowden, Henry Graham, Willard Floyd, and Wesley Sowards. Robert Klotman is a pledge.

THE YOUNG MEN'S CHRISTIAN ASSOCIATION

The year 1938-39 shows much improvement in the Young Men's Christian Association. Programs were designed with the interests of the men on the campus paramount. Subjects dealt with unionism, facism, and many other of interest to those in touch with world affairs.

Improvement was to found not only in the programs, but in the club rooms as well. With members doing the work the rooms were redecorated and modernized. New furniture in the modern mode was added to the club facilities. In the same room the organization offered ping pong and soon is adding billiards.

The advantages offered the commuter, who had not been previously taken of, were many. The membership at the present time is about one-third commuter.

The Y.M.C.A. discontinued its candy sales program and gave its sanction to a business man for this activity in favor of a percentage of his gain. Using this means for extra activity the Y.M.C.A. successfully sponsored hay-rides, theater parties, and a frosh party.

The association, however, has not forgotten its mission in regard to the permeating the campus with a spark of life's partner, religion. It has aptly been said that, "Religion and life are one and the same, or neither is anything." We can not but speak of the part that the Young Men's Christian Association has played in teaching us that life on the campus is living just as is life after the student goes out into the world. For this we are deeply indebted.

The Young Men's Christian Association has been admirably sustained in all of their programs by an interested administration, faculty and student body.

Officers for the past year were: Robert Goble, president; Phil Spain, vice-president; Earl Troup, secretary; Tony Alaimo, membership chairman; James F. Roose, publicity chairman; Fred Ernsberger, assistant publicity chairman; Ted Davies, chaplain; Morgan Griffith, social chairman; Larry Woodworth, program chairman; Dwight Wight, commuters secretary; and Professor Patton, faculty adviser.

THE YOUNG WOMEN'S CHRISTIAN ASSOCIATION

The Young Women's Christian Association held weekly meetings throughout the year. Some of the outstanding meetings were the "Poke Picnic"; a play given by Omega Phi Kappa; book reviews; and guest night for the Girl Reserves of the Ada High School. At the guest night, a play on the history of the Y.M.C.A., written by Mrs. Whitted, wife of Professor Whitted, was presented. The organization was fortunate in having Mrs. Boycheff, a native of Bulgaria, talk about her native country. She forcefully brought home the privileges which we as Americans enjoy. This year saw the start of the joint meetings with the Y.M.C.A. These were held once a month. The topic for the year was "A Better Understanding of Current Affairs." These joint meetings have been very popular and will be continued next year.

The Freshman girls were welcomed to the campus in the Fall by a series of parties culminating in the Big Brother,

Little Sister Party held under the joint auspices of the Y.M. and Y.W. The Y.M.C.A., assisted by the other women's organizations, sponsored the Christmas Candlelight Service, which has become a tradition at Northern. During the week before Christmas, the annual bazaar to raise funds for the Geneva Conference was held. During Religious Week, the organization's cabinet entertained Dr. Tippet, the speaker of the week; President and Mrs. Williams, Dean Audrey Wilder; and the cabinet members at a luncheon in honor of Dr. Tippet.

Several conferences have been attended by members of the group. Ruth Copper-smith and Betty Place attended the summer camp of the Y.M.C.A. at Lake Geneva in Wisconsin, in July. Doris Graybill, Margaret Moore, Charlotte Howe, and Martha Pounds, accompanied by their adviser, Miss Lewis, attended the spring training conference at Lake Erie College, Painesville, during April.

LEGISLATIVE BOARD AND HOUSE COUNCIL

Standing, Left to Right: Minick, Weaver, Condon, George, Sulmonetti, Dieffenbacher, Huher, McNeal. Seated, Left to Right: Booher, Schneider.

ASSOCIATION OF WOMEN STUDENTS

Left to Right: Booher, Sulmonetti, Schneider.

ASSOCIATION OF WOMEN STUDENTS

In order to further social and intellectual cooperation among women students, the Association of Women Students was organized in 1929. Upon registration, each coed automatically becomes a member of the organization. On the annual Women's Election Day, held in the spring, every coed has a vote in the A.W.S. election.

There are several traditional events which are sponsored each year by the A.W.S. On the intellectual side is the Feminine Forum. Through the efforts of the executive board, speakers are secured who present to the students, topics of especial interest to young women. Along the social line is the annual formal dance. This year the coeds invited the males of their choice to the Polar Bear Frolic. The Buckeye Boys from Lima furnished the music for the frolic.

Another annual event is the Earn a Dollar Campaign. During a specified

week, each girl must earn a dollar. Many clever and original methods are utilized in fulfilling this requirement. The money thus earned is placed in the Alumnae Hall fund. This year the kitchen was beautifully redecorated through the efforts of A.W.S.

Among the other activities which the A.W.S. held this year were the Fall and Winter registration dances, an old fashioned box social, a Superstition Party on Friday 13.

The executive board is the governing and legislating body for the woman students. This year the board was composed of Kathryn Schneider, president; Gloria Sulmonetti, vice-president; Esther Booher, secretary; Mary Swain, treasurer. Dean Audrey K. Wilder is the faculty adviser; it is largely through her efforts that the A.W.S. has been so successful.

LEGISLATIVE BOARD AND HOUSE COUNCIL

Two groups which are of utmost importance to Ohio Northern University women are the Legislative Board and the House Council. It is through these organizations that every woman on the campus is represented in discussions of vital importance to her college life.

The Legislative Board is composed of the executive board of the A.W.S., representatives of the four classes, the presidents of the Y.W.C.A., the W.A.A., the Pan-Hellenic Council president and the sorority presidents. Miss Florence Partridge, Dean of Women at Heidelberg College, was the speaker at the dinner this year.

Legislative Board members for the past year were Ruth Coppersmith, Y.W.; Norma Gray, W.A.A.; Mary McNeal, Pan-Hellenic Council; Helen Turner, senior; Jerry Disbrow, junior; Margaret Mathews, sophomore; Jean Cloore, freshman; and the A.W.S. executive board, composed of Kay Schneider, Mary Swain, Gloria Sulmonetti and Esther Booher.

The House Council was composed of Betty Reifensnyder, Jean Cloore, Jane Weaver, Helen Koogler, Eleanor Arnold, Ruth Eyster, Frances Huber, Lois George, Mary McNeal, Martha Condon and Catherine Fly. Dean Audrey K. Wilder is the adviser of these organizations.

THE NEW YORK CLUB

This year marked the reorganization of a once popular club on Northern's campus. The New York Club was originally organized in 1921. As it grew older it gained in prestige and influence until it became one of the most powerful organizations on the campus. Like a great many groups, the Club fared rather badly during 1929 and 1930. At last its difficulties proved too much, and the Club was dissolved in 1930.

In the reorganization of the New York Club, there is some difference from its old policy. The Club now counts among its membership a number of women while before the membership included only men. The purpose of the organization is to bring together socially those students whose home's are in New York State. No doubt as the Club becomes stronger its activities will cover a much broader field. Little fear can be had for the success of the group when one sees the total membership of fifty-five.

Increased interest on the part of the

alumni, in campus organizations, has become quite evident when the New York alumni requested the reorganization of the New York Club. At an early meeting this year, the Empire State students elected Frederick Wolff, president; Robert McTaggart, vice president; Charles Redner, treasurer; and Kay Knisely, secretary.

From the student's point of view, the reformation of the New York Club is what might be a stepping stone to the return of many of the societies now dormant. The value of the language clubs, the old literary clubs, and organizations such as the International Club is recognized in that they have the power to bring the students closer together. The literary clubs foster a type of friendly rivalry that is found too seldom today in our schools and activities. Then to, the groups offer an opportunity to the student for developing his forensic ability as well as broadening his education and his awareness of opportunity outside his immediate school group.

THE NEWMAN CLUB

The reappearance of the Newman Club on Ohio Northern's campus has been received gratefully by the Catholic students. The Club offers the Catholic students opportunity to promote better understanding among themselves and other students. Under the leadership of Dr. Walter Rogers the organization makes its appearance on the roster of Northern's organizations for the first time in many years.

The Newman Club is an organization of Catholic men and women on the campus. It is a Club of Catholic culture and Catholic friendship on the campuses of non-Catholic schools. The first group was formed at the University of Pennsylvania in 1893. It was from a chapter on the campus of Lehigh University that the

Catholic fraternity, Theta Kappa Phi, was founded in 1922.

Today there are about two hundred and fifty Newman Clubs on the prominent campuses of the country. That these groups are active can easily be shown by looking at their activities. Among their activities are the holding of Communion Breakfasts, numerous conventions, and participation in campus affairs.

Meeting regularly to discuss problems of most interest and concern, as well as to exchange points of view, the group is under the leadership of John Ranyas, president; John Gertz, vice president; Catherine Knisley, secretary; Mary Mohr, treasurer; Dr. Walter Rogers, faculty adviser; and Father Henry Westhouse, spiritual adviser.

NORTHERN HOLDS A BEAUTY CONTEST

Choice for queen and attendants was determined thru balloting by the student body. Most every one from Hedy Lamarr to Mrs. O'Leary's cow received votes.

To add humor to the contest the lawyers added their bit.

Starting at noon, a convoy of heavily curtained cars honked their way over the quiet boulevards of Ada. One car in particular, bore a sign reading, "The Lawyers' Choice For Queene." Rumors circulated as to who the queen was. Must stye tell, one lawyer was heard to say when quizzed as to the possible occupant. The tension was relieved when the "men of the bar" held a coming out party for their fraud.

Finally out of the chaos appeared the queen, Miss Dieffenbacher, aided and abetted by her three attendants, Misses Turner, Minick, and Koogler, to reign over the Homecoming Day festivities.

LUCYLLE DIEFFENBACHER: a member of Theta Phi Delta Sorority; senior in liberal arts; sociology major; antiques being a hobby.

HELEN TURNER: also a Theta; will graduate from the College of Liberal Arts this year; majoring in English; collects autographs for a hobby.

MARGARET MINICK: A member of the Phi Chi Sorority; senior in liberal arts; majoring in history and English; reading as a hobby.

BOILER TEST

Weighing coal before it was fired in the boiler kept one crew busy. During the test, 8500 pounds were consumed.

A Burke underfeed stoker supplied the coal to the boiler after it had been weighed by the crew assigned to that duty.

Crushing coal in the course of obtaining a sample for testing in a fuel calorimeter. Starting with a 1000 pounds, only a few remain for the final sample.

Discussing the test and power house problems: Left to Right—Walt Moorman and Bert McBride, powerhouse engineers, and Dean John Needy.

Checking flue gas temperature to determine heat loss through the stack. The gas temperature at the base of the flue was about 650° F.

Operating the Orsat apparatus in the analysis of the flue gases for a check on furnace combustion and heat losses.

Hottest job was reading temperature of steam calorimeter connected to steam outlet on top of boiler setting. Steam temperature 285° F.

Weighing feedwater before it was pumped into the boiler. During the test 70,000 pounds of water pass through the weighing tanks.

Reading the feedwater temperature while it was in the weighing tank was another source of test data.

BOILER TEST—Continued

Determining the generator RPM's by means of an electric tachometer.

A complete log of water pressure, voltage, amperage, etc., readings was made at 15 minute intervals.

Feats such as these, stories, and miscellaneous actions were common during the idle moments of the 16 hours.

Scene of the test was the University powerhouse. It furnishes the heat and power for the campus buildings.

NORTHERN GOES DANCING

Among the photographs in this book can be found a few portraying that which is, by now, a familiar part of college life, dancing. No small part of college life here at Northern is dancing. At this year's dances the participant found elaborate decorations and various stunts put forth by the sponsors of the dance with the hope that their dance might linger in the minds as one of the best of the year.

Among unusual decorations for the year could be found the Sig Ep winter formal with its caverns of paper. The TKK's featured a Spanish fiesta with Ferdinand featured in the decorations and a floor show to add spice to the evening. The A.W.S. presented the unusual when the gym appeared all decked out in a star studded sky and icicles on the walls for the Polar Promenade. The engineers transformed the big gym into a ballroom by furnishing their own walls and ceiling. High points were inserts in the walls showing various phases of engineering. Lighting was indirect.

Among the various stunts performed as entertainment were the dances staged at the T.N.E. Phoenician dance. Here there were such dances as those of the Phoenicians, the Greeks, and the dark ages. Balloons and snow balls released from the ceiling were featured by some of the fraternities. The inter-fraternity council's dance featured decorations by the different fraternities and so achieved a variety heretofore unknown. The Delta Sigs at their valentine dance took pictures of the guests and released the pictures the next day.

The most noticeable part of the campus dances was the studied decorum. Few jitterbugs showed their true color. With swing music apparently on the wane, at the close of the year the "swing cats" appear to be dying a slow death. Perhaps it is just as well, as the "jitterbug" took more than his share of the floor.

Duncan Williams, Rob Pease, Bob Rockne, the Buckeye Boys, the Buddies, and George Duffy were among the bands listed for the many dances. Dean of the hands to appear on Ohio Northern's campus was George Duffy. A rounded organization, the group furnished smooth rhythms that made for dancing that any devotee of the art could well appreciate. Duffy came to Northern after completing a tour of Southern colleges and universities.

The Winter quarter this season showed an increase in formals. Most of the winter formals were held on the campus, either

at the organization's house or at the gym. This should be some indication of reviving popularity in winter formals, as in the past few years it has been the policy to hold more formal functions in the spring.

In the musical organization line Duncan Williams, Joey Ray, and the Collegiateers seemed to be favorites and played for most of the dances. Of course Duffy reigns as undisputedly the best for the current year. Bob Deikman failed to put in his appearance, except for one or two of the more formal affairs. Tommy Mann and his syncopaters came in for the Spring trade as well. Mack Finch, an old favorite from back when, finished the season with the High School Day dance.

As to the type of music the students liked, it varied as the needle on a lie detector. When the dance music was of the recorded variety the tendency was toward Goodman and a bit of Shaw, and other masters of the "hot music." However, these numbers were of the slower tempos and not "killer dillers." When a band furnished the music the students preferred sweet music, but very sweet. One thing that vexed the visiting maestros was the failure of the students to request special pieces. In the recording department the tendency was for names rather than danceable tunes. High favorites were Kyser, Dorsey, Kemp, and Larry Clinton. Artie Shaw is coming up fast, while the old Bix Biederbeck recordings and those of Andy Kirk are known only to the intelligentsia.

Northern's dancing feet apparently are in accord with other campuses. While the "Down Beat" tells very accurately what the jitterbug will like in about six months, "Variety" says that its campus survey shows that swing is on top as the most popular type of jazz, with most campuses keeping a balance between sweet and swing. The season's most highly favored dance number in collegiate circles was the recording by Shaw of "Begin the Beguine."

Dances leaving lingering melodies in student's minds were the Sigma Phi Epsilon, Theta Phi Delta, Kappa Psi, Phi Chi, and Tau Kappa Kappa Winter formals. Of the informal dances the Phi Mu Delta swing session in the Fall quarter and the Delta Sigma Phi valentine dance in the Winter quarter rated well among the leaders. Of the all campus dances the interfraternity council's dance held in the Spring quarter won highest favorable comment. Generally the spring formals were the high spots in the Greek dance horizon.

ATHLETIC LIFE AT OHIO NORTHERN

Northern students and spectators drink bottled beverages, pop and chocolate milk, during the pigskin encounters.

Intramural basketball engagement from which the Phi Mu Delta's emerged with the championship. Score: Phi Mu's 21—Delta Sig's 18.

A creative dance, Nocturne, one of the numbers presented at the annual Polar Bear Nite Club.

Pyramid building, one of the many activities of the methods class, physical education department. These men are majoring in physical education.

Cheer leaders, Larry Zimmerman and Herb Park, the cute boys with the megaphones, didn't give up . . . for some day somebody may cheer.

Athletic life at Northern has a great diversity. Like activity life, it is mainly extra-curricular work. However, a good portion is carried on by the physical education department as class work both for those students taking a physical education course as a requirement and for those earning a major or minor in that department. Football and basketball has the largest following among the student body. Track and baseball have relatively little support. Fraternity rivalry, in the form of the intramurals, rises to a high pitch as each Greek organization tries to add as many cups as possible to their collection, the all-sports trophy being the most sought after of all.

FRESHMAN BASKETBALL

A large Frosh team turned out for the opening practice but only nine smooth playing first year students were still "in there" when the season ended. There is one outstanding fact about this year's Freshman team, namely, that the team as individuals showed only average skill, but as a team collectively they were superior. This one dominant factor promises Northern some real basketball hopes for the next several years. Nor did this team have just average workouts; rather, they furnished plenty of tough competition for this year's superb varsity. Is it any wonder that these two fine teams, the varsity and Frosh squad, when blended together gives Northern better basketball hopes for next year than is usually expected? In nearly every way there is more drudgery in being a member of the Frosh squad than of the varsity. The first year players go out there and give their all for not a game but just a practice to which none save the coaches pay attention. On the other hand the varsity has a chance to give their all for Alma Mater, and while so doing are lustily cheered by the enthusiastic students. Watch this club go to town next year when they are playing under ideal conditions.

VARSITY TRACK

The Bears opened the 1938 season as host to a superior Capital thin clad team. Although Northern showed up well in the field events, the Lutherans were too good on the track, hence the score, Capital 76, Ohio Northern 50.

The next track meet, Northern met Findlay at the University field and were quite entertained by the Orangemen in return. Reason: a lopsided victory for the Bears, 118 to 12.

The next team the Bear thin clads met was an evenly matched Heidelberg team. The two ran neck and neck all afternoon, and it was only the last main event, the relay, that spelled defeat for the Student Princes. Score: O.N.U. 65, Heidelberg 61.

For their next contest the Bears journeyed to Toledo University for the Northwest meet. T.U. outclassed all entries and Northern got away with fourth place. Among others contending were Bowling Green, Findlay, Heidelberg, and Bluffton.

The following meet the Bee Gees were the hosts. The opposition was a little too much for the Bears, taking an easy victory 79-47. The season closed with several members of the squad traveling to Baldwin Wallace to take part in the Big Six meet.

INTRAMURAL SPORTS—Continued

This is perhaps the most popular extra-curricular activity on the campus for men. Trophies are awarded to the winners of more than ten different athletic events. The winner, and also the runners-up of each event, are awarded points towards the all sport's trophy. Every

fraternity competes in the program and close competition prevails until the final contest.

Each sport comes under the class of a major or minor event. Major game winners gain twenty-five points while minor winners are awarded fifteen points.

WOMEN'S SPORTS

INCLUDING THE WOMEN'S ATHLETIC ASSOCIATION

WOMEN'S ATHLETIC COUNCIL

The officers and various heads of sports are active girls who carry on the work of the organization. They are responsible for the arrangement of the social functions and have charge of the numerous sport activities. The girls selected for the various departments are well qualified with the specific sport of which they are in charge.

Officers of the W.A.A. Council and the heads of the various sports that compose

the executive board are Norma Gray, president; Leila Mae Baum, vice president; Lycylle Dieffenbacher, treasurer; Betty Lee Arbogast, social chairman. Marian Kerr was in charge of basketball; Josephine Royon, volleyball; Margaret Slesman, archery; Vera Sherry, tennis; Betty Place, minor sports; Margaret Jones, hockey, and Mary Belle McPeck, gymnastic activities.

EXECUTIVE COUNCIL

Back Row, Left to Right: Dieffenbacher, Kerr, Raum, Place, Arbogast, McPeck, Royon, Slesman. *Front Row:* Gray, Sherry.

UPPER CLASS

Back Row, Left to Right: Arthur, Marling, Crawford, Ver, Hall, Stanfield, Kerr, Ramge, Royon, Atland, Koogler, Turner. *Middle Row:* Place, Shaw, Okuley, Slesman, M. Knisely, Cole. *Front Row:* K. Knisley, McPeck, Mathews, Sherry, Raum.

FRESHMAN

Back Row: Short, Hossellman, Kennedy, Lutz, Harris, Dilts, Messenger, Wyler, Horner, Rischoff, Crall, Jenkins, Graybill. *Front Row:* Rozarth, Parker, Runyon, Morris, Yancy, Blue, Slanker, McElroy, Rowers, Person, Wierman, Bailey.

Besides Ringling Brothers and Sells-Floto, the only comfortable haven for athletic, brawny women is the W.A.A. Within the confines of the gym and athletic field the gals can toss the pianos about or play jai alai. Other activities include frankfurter-fries, daisy-chain weavefests, and duckpins.

AIM

The aim of the W.A.A. is to provide a program of activities, broad enough and attractive enough to appeal to every girl in college. The program of the Women's Athletic Association includes the regular intramural events in all the major, intermediate and minor sports. Some of the special events include the Play Day for high school seniors, the football dance in honor of the varsity squad, the Revue which combines the activities of the year into one big show, and the Awards' Banquet, which recognizes the achievements of the members in the various activities.

PURPOSE

The purpose of this organization is the co-operation with the department of physical education for women in promoting interest in sports and gymnastic activities as a means of creating physical efficiency, athletic accomplishment, scholarship and good sportsmanship.

The group is divided in two parts: first, the junior group in which are found the smaller girls of the 120 pound class; and second, the senior group in which the girls are of the 132 pound class. To be eligible for initiation the girls must be able to chin themselves 30 times with one hand, as well as fulfilling other rigorous feats that are being devised all the time. Eventually the requirements will be so stringent that even Hippolyte, were she alive, would not be able to enter this organization.

PLAY DAY

The spring the W.A.A. held as usual its annual Play Day. On this day over 250 high school girls from many schools in the area were brought to the campus that they might become acquainted with college and university activities. From

the number of college boys that attended the exercises as spectators it is plain that the girls become acquainted with the school as a whole.

In the morning, the guests register and with the aid of squad leaders enter contests with girls from other schools. The girls enter into the contests in the spirit of true sportsmanship. The Play Day group with the most points receives the prize, which is announced at lunch time.

TAP DANCING

Among the favorite activities is that of tap dancing. Almost any time you can hear the beat of music and the clatter of taps upon the gym floor. Miss Tolf adds novelty to the tap routines by introducing new and clever steps. Classes are held for advanced tap students as well as beginners.

Tap dancing adds variety to the sports' program because it consists of action and grace in the movements of your body and feet. Then, too, one never knows when there is an Eleanor Powell in the offing and so advantage must be taken to bring out such latent talent.

ARCHERY

Another sport that is a favorite with the University women is archery. The game consists of placing the notched end of a long piece of dowel known as an arrow on the chord part of a bow, drawing back and letting the arrow fly in the general direction of a target. From then on you hunt for the arrow. Any one of these girls would gladly play William Tell, with the apple on your head.

Good archery is really quite difficult. It requires a steadiness not found in many sports, as well as coordination. The archer must know his bow, the normal flight path, and also the effect of the wind on the flight of the arrow. Too, archery requires and develops the ability to judge distances.

HOCKEY

The girls as well as the fellows go in for some of the rough sports, one of which is hockey. Anyone who thinks it is not very rough should try dodging a number of hockey sticks sometime. Many are the

times that the girls may be seen out on the athletic field participating in this vigorous game.

In the Fall, classes are organized for instruction in the fundamentals of hockey. After sufficient background has been absorbed, the group is broken up in teams, which hold competition among themselves. Being persistent about the whole thing, the girls stick at the game until the snow flies, when milder forms of sport are taken up in the gym.

FOLK DANCING

In contrast to the more vigorous sports is that of folk dancing. There can be little from the past that can be of greater interest than the dancing of our ancestors. Lively and entertaining, these dances provide an interesting part of the curriculum. Here the girls participate in everything from the square dance to the Virginia reels. Old fashioned gowns of gay colors help turn back the clock, and Northern coeds become coy maids of the crinoline days. The contrast of the folk dances with modern jitterbugging is interesting, unique, and makes the jitterbugs appear a bit queer.

RHYTHMS

In the same line with the folk dances are rhythms. Rhythms are somewhat different from the other activities, for it displays the gracefulness of the body in varied movements. The motions are studied in walking and dancing with careful ease and poise of the body predominating. Music adds emphasis and aids in the coordination.

The girls in the different classes, especially in the dancing department, have displayed their novel routines for many campus functions. Modern dancing in the more recent years has become quite popular. However, a clear understanding of this form of expression comes only to those who have participated in its performance. In this field, Northern's coeds have been fortunate in that they may take part in every performance.

VOLLEY BALL

In athletics, volleyball plays a large part in the women's program. During the Fall quarter a volleyball tournament is

held. The sororities and various independent houses organize teams that offer keen competition. This year the Wells' House girls defeated all comers, to win the cup. The teams put up a hard fight and spent much time in practice and preparation for the matches. The games are usually played on Thursday night and are refereed by girls.

REVUE

Every year the W.A.A. group sponsors a Revue. This is a review of the past year's work in the Women's Athletic Department, and its last performance was a huge success. The theme used was that of a night club, and the title "The Polar Bear Night Club." The Revue featured a floor show consisting of the various exhibits of the gym classes. The performance was one that would be hard to duplicate in any night club. The costuming was over and above anything attempted on the campus up to that time. By an extensive use of lights and drops, elaborate decoration was eliminated without destroying the effect for the audience.

An outstanding performance of the evening was the Hoop Dance. Costumed in gold metallic cloth, the group lighted with an elaborate system of spots, the girls displayed both grace and gayety in their interpretations. The tap dancing added zest to the evening's entertainment. The show included acrobatics as well as dancing. So well was the night club theme carried out that some of the spectators rather resented their inability to dance when the band was swinging out.

TENNIS

One sport that has taken the interest of the coeds with a vengeance is tennis. This is real tennis, not the lawn variety, and the coeds have taken up the sport so well that the courts are being used from dawn to dusk. In fact, the boys, lazy fellows, complain of being awakened in the morning by cries of five-forty and other bits of the tennis vernacular.

In the course of the year the girls have developed their serves and returns to a fine degree. A driving power has become one of their assets and more than average ability to cover a court, is necessary when playing these young ladies. These girls are no longer victims of love games.

MINOR SPORTS

Whether the weather is favorable for out-of-doors activities or not, the coeds always have ample opportunity for active participation in sports. When the days are disagreeable, games are played in the gym. Included in the inside activities are ping pong, shuffleboard, deck tennis, badminton, and deck tennis. Fencing is another indoor sport that is a favorite of many. Some other sports are free throw darts, jumping rope and jacks.

OPEN ROAD

For the out-of-doors girl who is tired of the more active sports, there is the open road hiking. This takes the girls out in the open, familiarizes them with nature, and gives them the satisfaction that comes with preparing and eating a meal out-of-doors. Too, there is companionship on the open road not to be found otherwise.

AWARDS

As in all competition the W.A.A. has found that participation and interest in-

creases when there is a goal to reach. In the way of a goal, the organization offers medals to the individual winners of any major, intermediate, or minor sports' tournament. This does not hold true, however, where there is a group representing a sorority or house in which a cup is given, if the group so desires.

Interest in all activities is enlivened by the competition for the all-sports trophy, which is awarded to the organized group winning the greatest number of combined points. Points are awarded to individuals or groups placing first, second, or third in any major, minor, or intermediate sports' tournament.

The tournaments in major sports cover volley ball in the Fall quarter and basketball in the Winter quarter. There are also a number of tournaments for the lesser sports included in the intramural program. Members of the coaching classes become quite capable in refereeing these contests, and by so doing gain valuable experience.

Though every girl participating may not win a medal or cup, she has gained valuable lessons and experience in good sportsmanship. The W.A.A. program is under the able leadership of Miss Alva Tolf.

ARCHERY

A popular women's sport during the Fall and Winter quarters is archery. On fair days you can see them on the archery range at the rear of Taft Gymnasium, bow in hand, eye on target.

This is *a* chosen athletic diversion by many since it is an outdoor sport with an informal routine. However, archery requires coordination and ability to *aim* which isn't possessed by all girls.

BASKETBALL

Basketball classes and tournaments are *a* Winter quarter activity. It is *a* speedy sport in which our most vigorous coeds participate. It seems that some of the girls do not get enough exercise going from class to class so to the gym they go to work off the surplus energy and pounds. Classes in basketball aren't restricted to those who plan to teach it. The inter-house tournament provides an opportunity for any girl interested, to participate.

FRATERNITY LIFE AT OHIO NORTHERN

The Interfraternity dance was the first all fraternity dance on the campus. Betty Shanks (above center) reigned as queen.

Bull sessions are a common source of information and amusement around a fraternity house. Sororities are afflicted also.

Preparing meals is an extra-curricular occupation of the more industrious sorority girls—looking to the future.

Dance intermissions usually are supplemented by those lives of the party who can sing or put on an act.

Musical groups, either instrumental or vocal are commonly heard emitting their strains from the chapter houses.

Those that have been connected with a fraternity or sorority while in college will recall many experiences that can be gained only within the walls of a Greek fraternal organization. Within these walls comes one's first experience of delving into politics, living and studying with individuals of various religious, education, desires, and ideas.

Northern has a total of twelve fraternities and sororities. two of the fraternities being professional.

While each chapter had informal dances following in the Spring quarter with more formal affairs, the social highlight was the interfraternity dance sponsored by the Interfraternity Council. Music was furnished by George Duffy and his orchestra.

INTERFRATERNITY COUNCIL

In the picture on the opposite page may be seen the guardians of the fraternities on Ohio Northern's campus. With nine fraternities on the campus, each filled with capable men, it is quite plain to see that something must be done to keep them toeing the line. Therein lies the purpose of the Interfraternity Council—hereafter known as the I.F.C.

The meetings of the I.F.C. are very, very business like, and usually follow a dinner in one of the fraternity houses. Legislation and approvals are handed out by this group that affect all the fraternities. The members of the I.F.C. are representatives from the fraternities—one each. At each meeting may be found the faculty adviser Dean Potter, who keeps the I.F.C. in order. The meetings are held monthly at a fraternity house chosen by the rotation method.

Among the duties of the council is that dealing with scholarship. The boys give

to the winning fraternity a grand prize of one loving cup, which will remain in its possession if the boys can keep up the brain work long enough. Somehow the fraternities find it hard to keep the cup two or three times in a row. Other activities include selling caps to the lowly frosh, and holding the football banquet for the grid boys.

This year, too, the boys in the I.F.C. took under serious consideration the idea of a dance. And very well taken, too, as the result shows. George Duffy and his boys were in the groove and rode it right on down. Such jive. The swing cats and alligators went for the stuff in a big way. Not a bit of schmaltz in the whole evening. Decorations showed variety and even originality, and the books showed a black balance that did not have to be confiscated by those mean old creditors. Socially, this really leaves something for the future I.F.S.'s to shoot at.

PAN-HELLENIC COUNCIL

The governing board of the sororities is the Pan-Hellenic Council. Two members from each sorority and their faculty adviser, the dean of women, make up the council. The purpose of the group is to provide a forum on campus activities and sorority problems.

One of the major problems, and one that receives much discussion, is that of scholarship. Like the Interfraternity Council, the group has attempted to solve the problem by awarding to the sorority having the highest point average for the past quarter, a trophy. The prize is usually a tray or some article of both use and decoration. The plan is apparently effective as the point averages for the group as a whole is quite high. As an added incentive, the trophy is awarded permanently to the group winning it three times.

Another phase of the council's work is the regulating of activities dealing with "rushing." This is to assure fair play. The group regulates the number of pledges that a sorority may hold at one time as

well as the period before which pledging may begin.

Not least of the activities is the fostering of amicable relations between the sororities themselves, as well as those relations between the women's Greek societies and non-Greek women.

Throughout the year the Pan-Hellenic Council sponsors a series of programs with the aim of stimulating interest in sorority life and activities. This has proved beneficial to all the women on the campus and would in itself justify the existence of the group.

Known to perhaps but a few, the Council is the originator and sponsor of High School Day. This year the high school students were the guests of the University on May 9th. Such a program affects not only the sorority groups but the campus as a whole. Such work is commendable and should be carried on by all groups on the campus.

The officers are Mary McNeal, president; Martha Condon, vice-president; Margaret Bretz, secretary-treasurer.

LEISURE MOMENTS IN THE LIFE OF THE EDS AND CO-EDS

Checkers help fill many noon hours in the fraternities.

Fishing tackle catalogues furnish reading for many.

Photography is the hobby of more than one student.

Snow offers opportunity for amateur sculpturing.

Morpheus finds another devotee, and a willing one.

From dawn to dusk the tennis courts are filled.

Shooting, both at targets and pests is for the gunman.

The clang of iron on iron tells of a ringer.

Knitting is both useful and interesting.

Entertaining Him after the show.

Stag party for the girls, and they like it.

Watching the varsity with a varsity man.

A turn around the town and a stop at Balish's.

Bicycling keeps that school girl figure.

Into the Sugar Bowl for a bit of trucking.

Passing the word along. He was a good date, but . . .

CO-ED HOUSES

The residences for girls who are not affiliated with a sorority on the campus, and for Freshman women, are organized under the supervision of the Association of Women Students' Board. The vice-president of the Board is primarily

responsible for the house programs. She personally visits each residence unit and conducts the election of their officers. Their president, in turn, represents the group in the Legislative Board and House Council meetings held each month.

PICTURES TO THE EDITORS

Sirs:

Some time ago I had an opportunity to photograph Ohio Northern University from the air. I am sending you two prints, and I hope that they may prove of interest to you. One is a picture of the athletic field, the other the main campus. A close examination of the former will show the football team practicing.

R. FREDERICK JAMES

Ada, Ohio

Sirs:

Ohio Northern University students have been pleased to have among them this year two Chinese girls. They are Teresa and Aurora Alay, daughters of Mr. and Mrs. Felipe Alay, Havana, Cuba.

They reside at the Moorman house and are enrolled in the College of Liberal Arts. Before coming to Ada they attended school in Havana, and in Canton, China. Accustomed to servants in their home, the girls had never learned to cook. Wishing to learn this too, the girls put on aprons and pitched right in. Their most difficult task was peeling spuds.

MRS. W. E. RTNKLEY

Ada, Ohio

Theresa and Aurora Alay line up the Irish situation.

PICTURES TO THE EDITORS

Continued

Sirs:

Here are some pictures I took at the freshman-sophomore fight, last fall. The second-year men were greatly outnumbered and even more so when the frosh football squad entered the battle. The fight didn't take place however without an argument as to who **would** defend the flag. By custom it was up to the sophomores, but they didn't feel equal to the task.

J. FREDDIE ROOSE

Delta Sig Home

The debate over, the frosh attack and are repulsed. Most of the attacking force was hurled to the ground. The sophs are concentrating on the area immediately around the flag pole.

The fighting spreads out and includes the area occupied by the spectators. As can be seen, not all cared to take part in the fighting.

The frosh football squad arrives and the superior numbers soon tell. The sophomores are soon pushed from the pole, Rutledge and Conners are raised above the heads of their aids.

The frosh are victors in less than twenty minutes when Conners tears the flag down.

PICTURES TO THE EDITORS

Continued

Sirs:

As perhaps you know, the bell tower at Ohio Northern has been the tryst of mysterious individuals. As I was a member of such a group I am enclosing a picture of the clapper.

A. READER

Ada, Ohio

Sirs:

Of all the peregrinators and ministers of the gospel to make their appearance at Northern. I believe the Reverend Donald Tippet was the best. His manner of conducting Religious Week made it interesting to all. His remarks on Europe were tops.

Sirs:

From the highest movie star to the lowly college student the carvings of Bert McBride, University powerhouse engineer, are well known. Specializing in small objects, most of his carvings are made from peach seeds. His work is highly appreciated.

ARTIE CARVER

Columbus, Ohio

Sirs:

Here's proof that not all "profs" take life too seriously. Here they are taking their fling at *Life*. I wonder what page holds this studied interest. Is it Sally Rand, Eleanor Roosevelt, or Senator Hornblower? Better not tell or the censor will take action. After all, pedants need a let-up "after the ball" or are we?

PAT NEW WEN

Ohio Northern University

Ada, Ohio

GABNEY FINALE

Silence reigns. No one had their rain-coats. Off in a corner the mice were quietly chewing on the engraving contract. The editor slowly raised himself to a sitting position, he had been sleeping over his broken-down typewriter, and looked around. He said nothing, only wondered where the staff might be.

The nickelodian blared away. Above its blatant sound could be heard the harsh scuffling of feet; the staff was at the Sugar Bowl. Each had an assignment and was doing all in his power to evade the responsibility. Carhart and Ruth Hover were dancing. Roose sat on the floor wondering what the aperture should be if the picture were to have the proper contrast.

Shannon rose from his chair and finally decided to do the work himself. Shortly thereafter he cut in on Carhart. Campbell finally got out the copy for the "Little Wonders" organization. Wilma Jane slowly typed the copy on the form sheet. Roose accidentally tripped the camera shutter and decided to call it a day. Richardson and Wertheimer cooked a wild duck over a flaming can of mounting cement for Peggy Moore's lunch. Marge Ramage came browsing around—wondering what happened to her copy on women's athletics.

Bill Feth was hard at work on the advertising. At that moment he was covering the possibilities of the Ada theater. The show was the Boy Scouts of Thompson Corners, chapter five.

Where did the editor put the dummy? No, not Charlie McCarthy. The last was too much for him. Veteran that he was, this yearbook might prove too much. Almost at the point of collapse, he crawled up on the desk, pulling the roll top over him he quickly fell asleep. The last bit of copy clattered over the rail joints on its way to Pittsburgh and the staff slipped out of the office on their way back to the Sugar Bowl.
